StreetSyncTM

Empowering Municipal Workforce

GPS-based Tracking Solution for Efficient Street Cleaning
and Employee Management

Comprehensive GPS Employee Tracking for Sweepers

- Real-time GPS tracking for efficient route management
- Provides live updates on location and work status
- Monitors employee performance and time management
- Accurate reporting of hours worked and areas covered

Why StreetSync Tracker?

INCREASED PRODUCTIVITY:
STREAMLINE ROUTES AND
REDUCE IDLE TIME, BOOSTING
THE OVERALL EFFICIENCY OF
STREET SWEEPERS.

REAL-TIME MONITORING:
TRACK EMPLOYEE LOCATION
AND PROGRESS IN REAL-TIME,
ENSURING COMPLIANCE WITH
DAILY TASKS.

COST-EFFECTIVE OPERATIONS:
OPTIMIZE MANPOWER
ALLOCATION, REDUCE
OPERATIONAL COSTS, AND
IMPROVE SERVICE DELIVERY.

ACCOUNTABILITY: AUTOMATIC
RECORDING OF WORK DATA
FOR ACCURATE PAYROLL AND
COMPLIANCE CHECKS.

PUBLIC SATISFACTION:
ENHANCED VISIBILITY OF
MUNICIPAL CLEANING
OPERATIONS, LEADING TO
IMPROVED PUBLIC
PERCEPTION AND TRUST.

Detailed Reporting for Informed Decision-Making

Work Completion Reports: Track daily cleaning tasks and area coverage.

Performance Analytics: Insights into individual and team performance, helping identify improvement areas.

Time Tracking: Detailed logs of time spent at each location, ensuring optimal productivity.

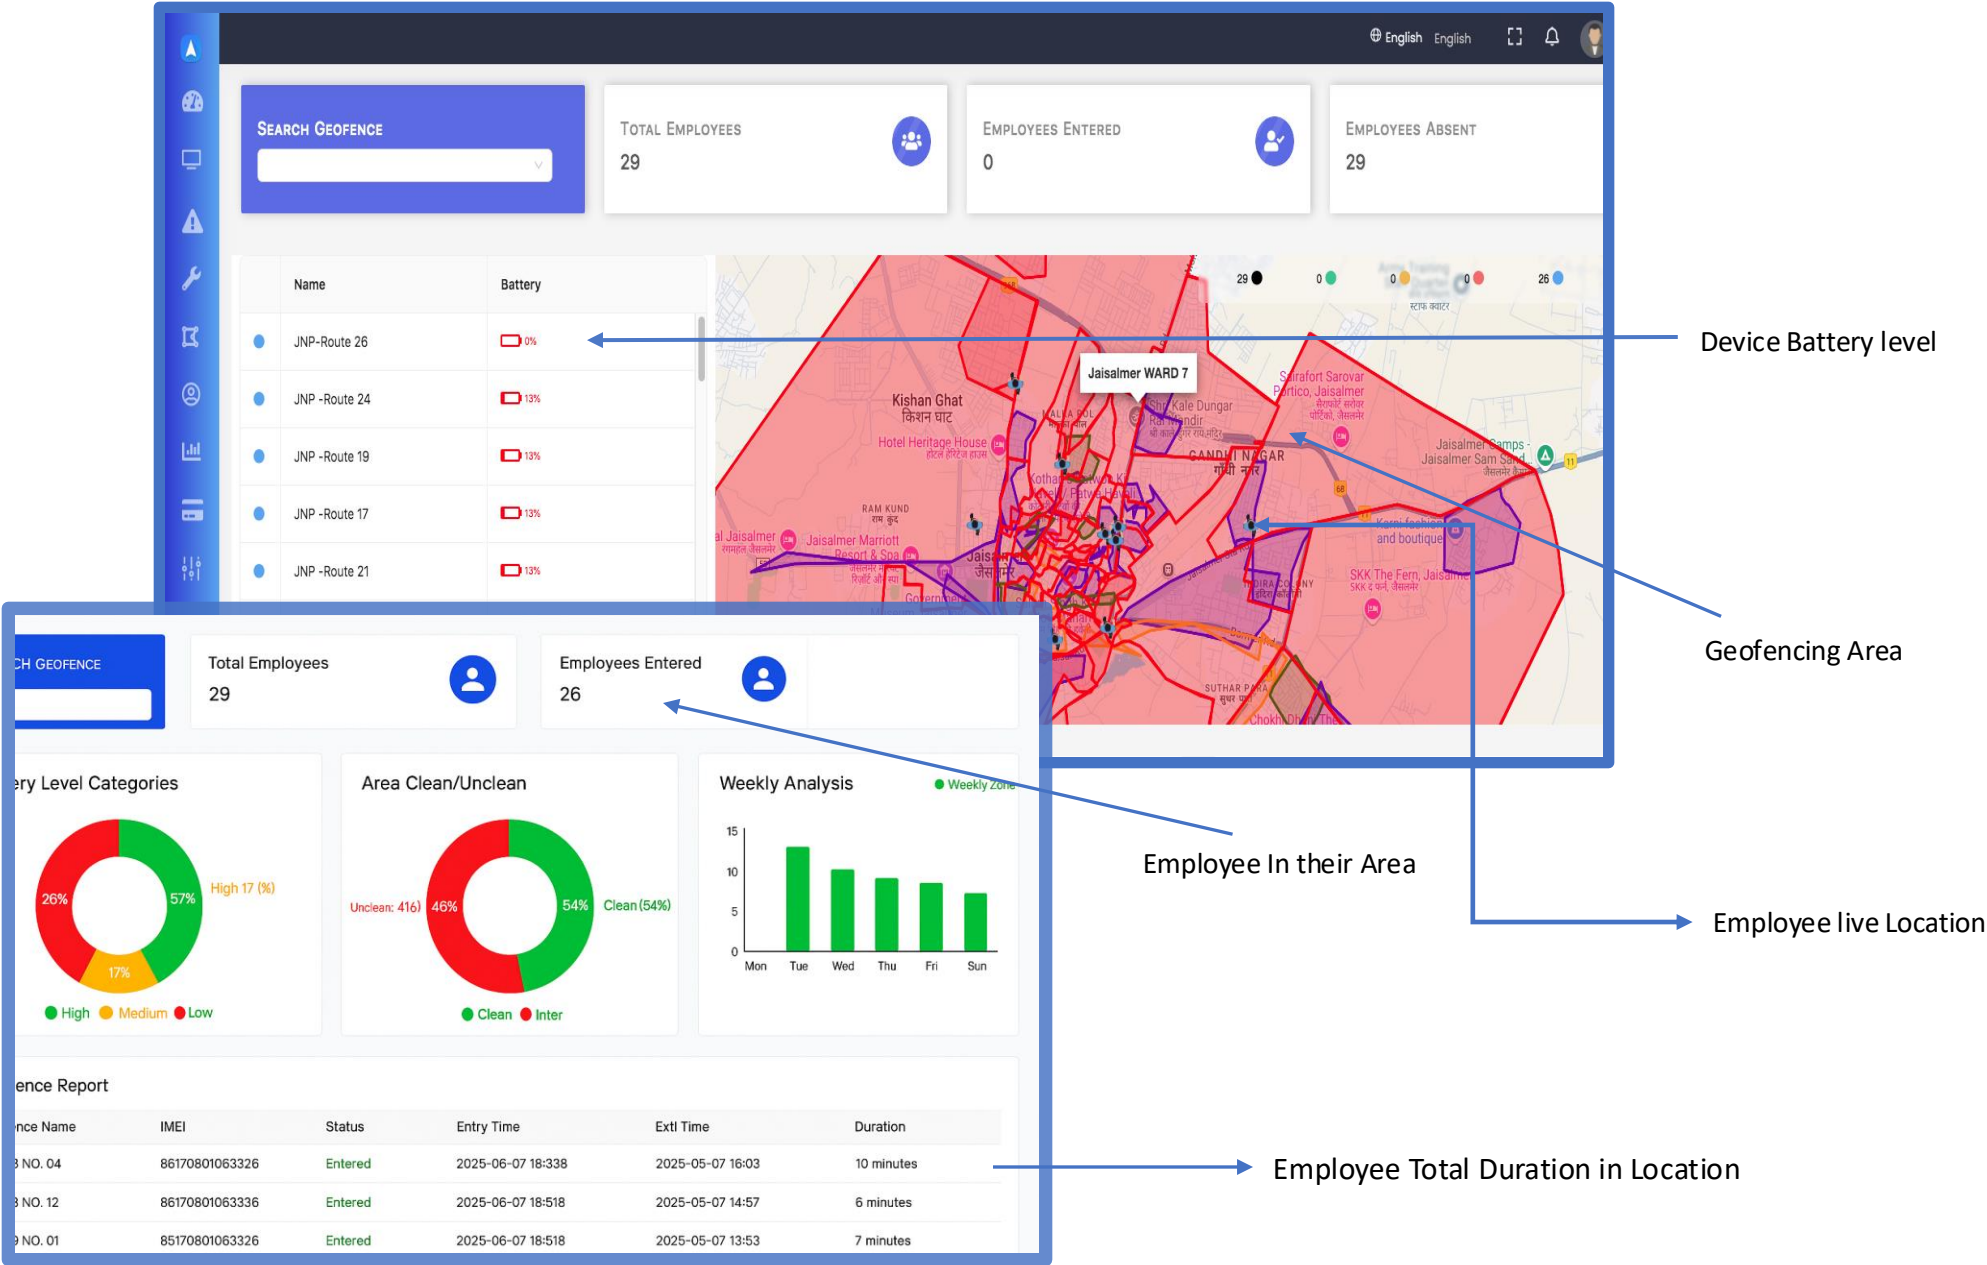

Performance Analysis
Evaluate Efficiency metrics by ward, team or individual.

Compliance Reports: Ensure adherence to safety and work-hour regulations.

Our Solutions
Dashboard

Manager Dashboard

This centralized dashboard allows office managers to:

- Monitor Live Location of all field employees in real time
- View Geofenced Areas to ensure employees stay within assigned zones
- Track Live Activity on the Map, including route movement and stopovers
- Check Device Status: Active, Idle, or Offline
- Make Informed Decisions using visual maps, live status, and device analytics

Employee Visit History

Stops • Idle Time • Movement Tracking

This section displays the detailed history of an employee's movement including daily, weekly, and 30-day logs showing routes taken, idle durations, and stop locations.

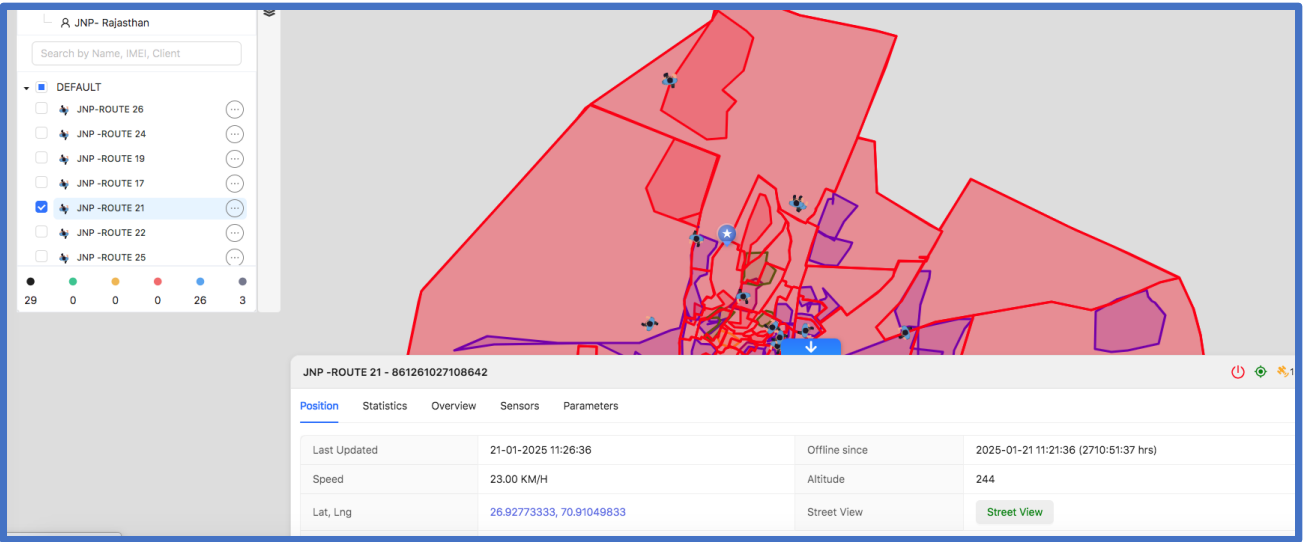

Geofencing Window

Satellite View • Easy Fence Creation

This section demonstrates how to define a geofence around a specific location using satellite imagery for precision and ease.

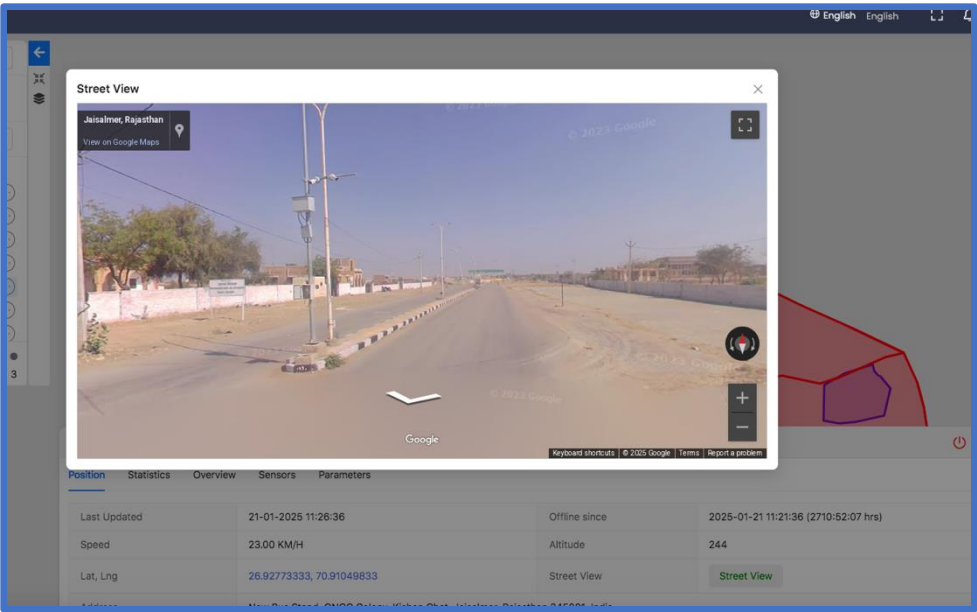

Employee Live Location

This section displays the real-time location of each device, along with technical metrics such as battery status, speed, and sensor activity.

Street View

This section provides a real-time street-level view of the location where the device is currently active, enhancing situational awareness.

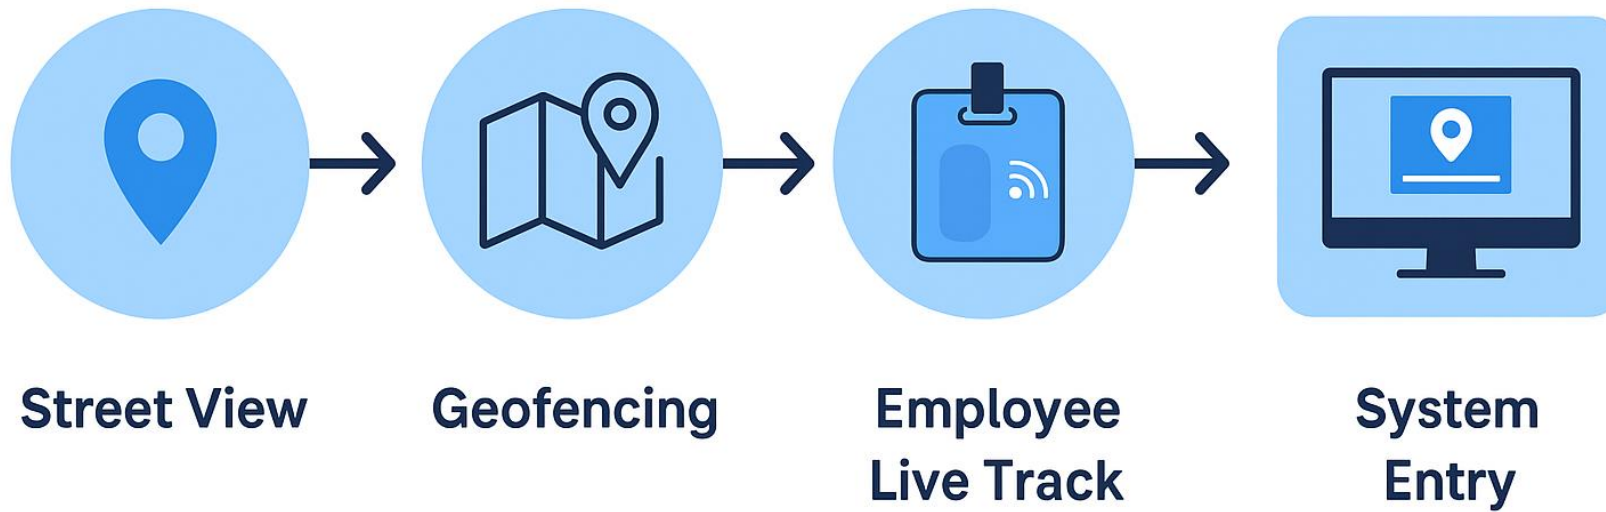

Device Features

- Long-lasting Inbuilt Battery
- Inbuilt Voice Monitoring Mic
- Panic Alerts
- Light Weight
- Two-Way Calling
- Asset Tracking
- Real-Time Location Tracking
- Emergency Response
- History Playback
- Geo-fence

Implementation Process

Seamless Integration & Scalable Support

- **Quick & Hassle-Free GPS Device Setup**

Plug-and-play installation on sweeper equipment with minimal downtime.

- **Intuitive Mobile App for Field Staff**

Designed for ease of use by non-technical employees to ensure accurate tracking and updates.

- **Cloud-Based Dashboard for Managers**

Real-time access to employee locations, geofence activity, and status alerts from any device.

- **24/7 Dedicated Support**

Ongoing technical assistance and training to resolve issues quickly and effectively.

- **Future-Ready & Scalable**

Easily expandable to support additional wards, routes, or employee roles as your municipality grows.
